EQUITYBRIEF

Get up to speed on any company in under a minute, with a source for every fact.

THE PROBLEM

Advisors don't have time to read before client meetings

- Key facts are scattered: today's price in one place, the company's annual report in another
- That annual report is often **100+ pages** of dense legal and financial language
- What advisors tell clients must be **accurate and traceable**

WHAT WE BUILT

Enter a stock ticker (e.g. AAPL)

You get, in about 15 seconds:

- **Today's stock price**
- **A one-page summary** of the latest annual report: business, key financials, top risks, management's view, what to watch
- **Talking points** and **questions the client may ask**

Example: Apple revenue $478.8B, up 15%; iPhone sales up 21%

BUILT FOR TRUST

Every claim can be checked

- **Every point is sourced** to the exact section of the official SEC filing
- **Quotes are checked automatically**, and anything unverified is flagged
- **Facts only:** no guesses, no buy/sell advice
- **Honest about limits:** missing information is flagged, not filled in
